Joint AsMA-UHMS Annual Scientific Meeting

WELCOME

Please join us May 17-21, 2026, for our joint Annual Scientific Meeting of the Aerospace Medical Association (AsMA) and Undersea and Hyperbaric Medical Society (UHMS).

This joint meeting will offer a unique assembly that no other professional medical organization can equal. The attendees join from around the world and include those in the professional fields of Aerospace, Hyperbaric, and Undersea Medicine. The target audience includes, but is not limited to, physicians, nurses, physiologists, human performance and human factors experts, physician assistants, public health experts, environmental medicine experts, and a host of scientists and technicians who are engaged in the policies, operations, and research of their respective industries on an international scale.

Aerospace, Undersea, and Hyperbaric medicine are truly multi-disciplinary and international. Our Annual Scientific Meeting presentations come from diverse experts who will enhance the world's knowledge and understanding of the current challenges in these industries, and demonstrate an impact on improving the health, safety, and human performance of those involved in aviation, space, clinical hyperbaric medicine, undersea and extreme environments. Our Annual Scientific Meeting presents an opportunity to learn about the work of our colleagues worldwide and share the knowledge and wisdom we gain in our day-to-day work and practice.

Listed below is a breakdown of the attendees at most recent Annual Scientific Meeting. AsMA and UHMS leadership always encourage the registrants to visit the exhibits often. The exhibit area an integral part of our scientific program in that there is much to be learned by talking with company representatives and examining their products.

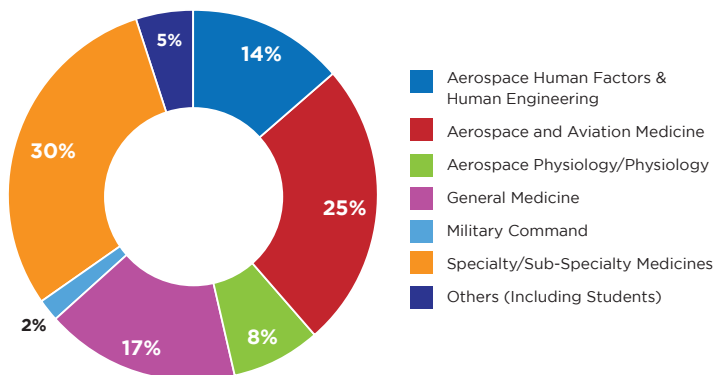

Please join us next May 2026, in Denver, Colorado! You will certainly find it beneficial with a large attendance, the people you will meet, and connections made with colleagues from the entire aerospace, undersea, and hyperbaric medicine community, the superb scientific sessions, and the abundance of attractions in the area. We will personally visit each exhibit throughout the week and look forward to giving your organization visibility on a much larger scale!

Sincerely,

John S. Peters
